

**Dry Remediate - Bioremedial Agent for Hydrocarbon Contamination**

Dry Remediate™ is an active mixture of hydrocarbon-oxidizing, naturally occurring, single-celled micro-organisms with a natural, bio-remedial absorbent. It is specially formulated to be safe, environmentally enhancing and effective.

<b>Dry Remediate</b>	
<b>Appearance</b>	Grey Powder
<b>Odour</b>	None
<b>Soluble in water</b>	Insoluble
<b>pH</b>	6.9 to 7.2
<b>MicroNutrient</b>	
<b>Appearance</b>	Blue Crystals
<b>Odour</b>	Ammonia
<b>Soluble in Water</b>	Complete
<b>pH</b>	6.9 to 7.2
<b>Boiling Point</b>	100° C
<b>Evaporation rate</b>	Same as water
