

**DON'T  
CHANCE A  
DEVASTATING  
FIRE**

**SAFELY STORE FUELS AND CHEMICALS  
IN SPECIALLY DESIGNED SAFETY CABINETS**

## **Improper handling & storage**

of flammable/ignitable liquids remains the leading cause of industrial fires. Safety cabinets substantially reduce that risk, and as a result, protect your people and property.

## **Why you need a Safety cabinet**

Keep dangerous liquids safely organized and segregated

Ensure time for safe evacuation in the event of a fire

Provide compliance with OSH Act regulations and your local by-laws

Improve awareness – high visibility cabinet colour and prominent labelling

Easy and efficient locating of materials near the point of use

Better security with locking mechanism
