

14169 – 4L Type I Oval Poly Can for Flammables with Bottom Faucet

Nonmetallic Laboratory Safety Cans have all the benefits of Justrite's Type I polyethylene safety cans, with the addition of a self-closing faucet for easy dispensing. All fill spouts have a pressure-relief cap with stainless steel flame arrester. Hardware featured on the can top is stainless steel for maximum corrosion resistance and long life. The five-gallon size also features a vacuum-relief valve in the lid allowing liquids to flow smoothly. Justrite's unique patented, current-carrying carbon insert imbedded into the container provides for proper grounding.

Nonmetallic Shelf Cans have a faucet mounted two inches above the bottom to eliminate lifting the cans during dispensing.

Size	292 H x 184 Outer Dia. (mm)
Capacity	4L
Material Specifications	Polyethylene
Fittings	Stainless Steel
Colour	Red
Tare weight	4kg
Approvals	FM
Compliance	NFPA
