

SD20 – Chem Store[®] suitable for up to 20 x 25L containers

The base is manufactured from 3mm mild steel with 2mm side and door panels. The double doors are hinged and lockable while inside the unit is shelved for 5ltr and 25ltr containers above a fully seam welded sump that has a galvanised grid mesh removable deck. High and low level louvre vents with flame arrestor mesh and forklift transport hoops are fitted as standard and the unit is shot blasted before being painted.
